## PERSONAL PROJECTS

### M-PESA APPLICATION

- Created an M-Pesa app clone as a fun project using MVVM architecture, I even tested all my classes and the whole application.

### COMPOSE LOADERS LIBRARY

- I am creating and yet to publish a Java/Kotlin android Library that helps with unique loaders used in Jetpack Compose.

### UBER CLONE

- This app is written with Kotlin and jetpack compose using third party serverless tools majorly Firebase and google Maps APIs and services as the heart of the backend. It is also written using MVVM architecture.

### INSTAGRAM CLONE

- Developed this website with typescript, Prisma and Mongo db. All code is written and tested with GitHub workflow and passed through a CD pipeline, Vercel.

### AIRBNB CLONE

- Developed this website with typescript, Prisma and Mongo db. All code is written and tested with GitHub workflow and passed through a CD pipeline, Vercel.
